

July 26th - 30th

LEGO M

!

Do you have what it takes to be a MASTER LEGO Builder? Only a few individuals every year are selected to join this elite, not to mention super-fun group of professionals! Students this week will learn to sharpen their LEGO building skills as well as learn the fascinating history behind the birth of the LEGO. We will explore some of the world's most famous LEGO creations. Have you ever painted with LEGO's? *You will this week!*

We are VERY excited about this weeks activities!

Each of our students will receive:

- ◆ *The official LEGO July & August BrickMaster magazine*
- ◆ *The official LEGO August Calendar with 50% off coupon*
 - ◆ *The official LEGO Design-BY-me instruction card*
- ◆ *The official LEGO V.I.P. Membership Program enrollment packet*

The students had a BLAST last week! The weather proved to be less than perfect...but we cant say that it stopped us from making a splash on the slip'n-slide, and with the water balloons! The biggest hit may have been having Popsicles outside for snack!

The students were very active during circle lessons about the use of water and the effort to conserve water all over the globe. They asked great questions and had even better ideas to share!

REMINDER:

As we look ahead to August we want to remind you that as noted on the Summer Calendar, Ari's Academy is closed on Friday, August 13th.
